SUMMARY

Entry-level Web Developer with internship experience in developing web applications. Passionate about building responsive user interfaces and solving real-world problems through modern web technologies.

SKILLS

Frontend
- HTML5 • CSS3 • JavaScript (ES6+) • React.js • Responsive Web Design

Backend & Database
- PHP • Supabase • MySQL

Programming Languages
- JavaScript • PHP • Python

Tools & Platforms
- Git • GitHub • VS Code • Vercel • Netlify

CMS
- WordPress • Shopify

Core Competencies
- REST API Integration
- CRUD Application Development
- Authentication & Authorization
- Component-Based Development
- Version Control (Git)
- Responsive UI Development
- Database Integration
- Debugging & Troubleshooting

Professional Skills
- Collaborative Development using Git/GitHub
- Problem Solving & Debugging
- Effective Communication in Cross-functional Teams
- Fast Learner and Adaptable to New Technologies

INTERNSHIP EXPERIENCE/PROJECTS

Company Membership Website

- Developed a responsive membership management web application using React.js and Supabase.
- Built reusable React components, role-based user interfaces, and responsive layouts for desktop and mobile devices.
- Integrated Supabase Authentication, database operations, and real-time data synchronization.
- Implemented CRUD functionality for user accounts, memberships, products, and rewards management.
- Developed an interactive Spin-the-Wheel rewards system with dynamic prize selection and user participation features.
- Collaborated with a fellow intern using Git and GitHub following a version control workflow.
- Deployed the production-ready application on Vercel and participated in testing and bug fixing.

Technologies: React.js, JavaScript, HTML5, CSS3, Supabase, Git, GitHub, Vercel
Live Demo: https://stssi-membership-website.vercel.app/

SIMP (STSSI Installers Management Platform)

- Developed a responsive role-based web platform for Installers, Customers, and Administrators using React.js and Supabase.
- Built reusable React components, dashboards, and responsive interfaces tailored to each user role.
- Implemented authentication, CRUD operations, job posting, worker applications, qualification-based worker assignment, and administrative management features.
- Developed an upskilling system that tracks worker qualifications and unlocks access to higher-level job opportunities.
- Integrated Supabase Authentication, database services, and real-time application data management.
- Collaborated with a fellow intern using Git and GitHub in a shared development workflow.
- Deployed the production-ready application on Vercel and participated in testing, debugging, and feature enhancements.

Technologies: React.js, JavaScript, HTML5, CSS3, Supabase, Git, GitHub, Vercel
Live Demo: https://simp-project-tan.vercel.app/

Company Website Maintenance & Content Management Systems (WordPress & Shopify)

- Maintained and enhanced company websites using WordPress and Shopify.
- Implemented content updates, page layouts, and minor frontend customizations using HTML, CSS, and JavaScript.
- Completed previously unfinished website tasks and resolved issues to improve functionality and user experience.
- Ensured website content, layouts, and features were updated according to client and business requirements.
- Performed ongoing website maintenance and troubleshooting to support production websites.

Technologies: WordPress, Shopify, HTML5, CSS3, JavaScript

PERSONAL PROJECTS

Polap – Polaroid-Inspired Photo Capture Web Application

- Developed a responsive web application that allows users to capture, preview, and save photos in a Polaroid-inspired interface.
- Implemented camera access and image capture using modern browser APIs with an intuitive user experience.
- Designed a clean, mobile-friendly interface focused on simplicity and ease of use.
- Deployed the application using Netlify with version control through Git and GitHub.

Technologies: HTML5, CSS3, TypeScript, JavaScript, Git, GitHub, Netlify
Live Demo: https://polapbycy.netlify.app/

30-Day Workout Program Web Application

- Developed a responsive fitness web application that provides a structured 30-day workout program with daily exercise routines.
- Designed an intuitive navigation system to help users easily track and access daily workout plans.
- Built a mobile-friendly interface optimized for both desktop and mobile devices.
- Deployed the application using Netlify with version control through Git and GitHub.

Technologies: HTML5, CSS3, JavaScript, Git, GitHub, Netlify
Live Demo: https://thebrogram30daysworkoutprogrambycy.netlify.app/

SCHOOL PROJECTS

Self-Assessment Website for BET-CPET Enrollment | Academic Team Project

- Collaborated with a development team to build a mobile web-based self-assessment platform for prospective BET-CPET students.
- Assisted in designing responsive user interface components and improving the overall user experience.
- Identified, debugged, and resolved frontend issues during development and testing.

Technologies: HTML5, CSS3, PHP
Live Demo: https://bucolic-pudding-173f6b.netlify.app/

EDUCATION

Bachelor of Engineering Technology Major in Computer Engineering Technology
Technological University of the Philippines – Manila
2022 – August 2026 (Expected)

- Expected Latin Honor: Magna Cum Laude
- Thesis: Development of an Employee Deployment Monitoring System with Verifier using Facial Recognition and Geolocation
